Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 8/9/2004, with respect to the rejection(s) of claim(s) 1-20 under 102(b) and 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 6, 7, 9, 11, 13, 15, 16, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lippisch (2,743,888). Lippisch discloses a vortex generator having a plurality of vorticity generating protuberances parallel to the longitudinal axis, between the upper and lower surfaces of the aerodynamic surface (see Figure 1).

a. Re - Claims 5 and 14: Lippisch discloses retractable/extending protuberances in Figure 3.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3644

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 4, 8, 10, 12, 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lippisch in view of Wake (5,785,282). Lippisch discloses every aspect of the applicant's invention except wherein the vorticity generating protuberances extend from the tip of a helicopter blade. Wake et al however teaches that it is well known in the art to use a sub-wing on the tip of a rotor blade of a helicopter. (see Col. 2, lines 16-22) It would have been obvious to one having ordinary skill in the art to combine the teaches of Wake et al into the device of Lippisch for the purpose of mitigating the BVI noise radiated from the main rotor assembly of a helicopter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A. Holzen whose telephone number is 703-308-2484. The examiner can normally be reached on M-F 7:30 - 5:00.
